**DETAILED ACTION**

1. This office action is responsive to the reply filed on 02/27/2009.

***Response to Arguments***

2. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Membrino (US 3,889,449).

- With respect to claim 1, Membrino discloses a bagging machine that meets all of applicant's claimed subject matter; in particular, the bagging machine of Membrino comprises: a charging member (60) attached to a base (116) for holding a plurality of bags (50), and a pivoting base portion (16, 36, 38, 42) supported by the base (116); wherein the pivoting base portion is formed with a chute (12) having an opening and an end plate (48) that presses to hold the plurality of bags (50).

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3721

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Membrino (US 3,889,449).

The bagging machine of Membrino meets all of applicant's claimed subject matter but lacks the specific teaching of at least two sheets of end plate surrounding the opening being inclined downward toward a center side. However, the end plate (48) of Membrino is a curved plate that surround the opening of the chute (12) is considered to be equivalent to the claimed end plate comprising at least two sheets because the curved end plate of Membrino serves the same function as the claimed end plate.

***Allowable Subject Matter***

7. Claim 3, 4, 8, 9, 11, 12, 15 & 16 are allowed.

8. Claims 2, 6, 7, 10, 13 & 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

10. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Art Unit: 3721

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
